

Issues to consider now and along the way:

- What process does the Board want to use to create a new strategic plan?
- What is our timeline for completing this process?
- What are the health issues we want this organization to address?
- What services will our organization be providing this year, next year, in the next 5-10 years?
- How should we organize our programs and staff to best provide our services?
- Where could there be more efficiency in our operation?
- What value do we place on monitoring and reporting systems?
- What investments in workforce training are needed?
- Will our current IT/data systems meet our future needs?
- Are our vision and mission statements relevant to the work we do/intend to do?
- What are our staffing and budget needs in 3-5 years?
