Chicken pox vaccine program announced

(Lawrence, KS) – Now is the time for families to take advantage of a special program that will provide the immunization against chicken pox (varicella) at a reduced rate.

The Kansas Immunization Program (KIP) has been awarded American Recovery and Reinvestment Act (ARRA) funding to provide varicella vaccine to adolescents ages 10 through 18 in need of a first or second dose of the immunization.

While there is no fee for the vaccine, there is a \$14 administration fee (the vaccine alone currently costs \$85). However, no one is denied service due to an inability to pay.

Kansas schools require proof from a physician of a previous history of the disease and depending on the child's grade level, one to two doses of the vaccine. Starting with the 2010-2011 school year, two doses of the vaccination will be required for kindergarteners and first graders. Currently, one dose is required for all other grades.

All adolescents ages 10-18 should take advantage of this opportunity to get vaccinated now at a reduced fee and not wait until it is required. No appointment is necessary. Clinic hours can be found at www.ldchealth.org/contactus.htm.
