Number of People in Douglas County Tested During Outbreak: **1,986** ([KDHE testing map](#))

Current LMH Health Inpatients Positive for COVID-19: **1**

- Like the KDHE today, we have begun including probable cases in our total count. A probable case is someone with consistent symptoms who is a contact of a positive case. The person has not been tested, which is why they would not be considered a confirmed case.
- Lawrence-Douglas County Public Health has released preliminary data on the COVID-19 testing rates by race and ethnicity. [See our current testing rates](#)
- With recently relaxed testing protocols, anyone currently experiencing symptoms related to COVID-19 is encouraged to contact his or her primary care physician. Anyone without a primary-care provider can call the Lawrence-Douglas County Public Health Coronavirus hotline, 785-856-4343, where nurses are available to provide initial screening and if needed, directions on how to get tested.
