Current LMH Health Inpatients Positive for COVID-19: **8**

- As part of [Education Unified Command response](#), Lawrence-Douglas County Public Health has developed the following [COVID-19 Smart and Safe School Reopening Guidance](#) to assist K-12 school districts and families in [decision-making for the upcoming school year](#).
- We have worked with KU to [encourage all students, faculty, and staff](#) to give a Lawrence or Douglas County address when testing. Generally, a COVID-19 positive case is assigned to the county where the person is currently living — so not the person’s permanent address if they are a college student originally from another county or state — to help with the disease investigation, contact tracing and isolation efforts to ensure the best public health efforts are in place to keep the person from potentially exposing others in the community.
