More Information at [LDCHealth.org](#) and [douglascountyks.org/coronavirus](#)

- The new cases that we report each weekday are the ones we report to you as we know about them — when the COVID test result is completed and we are informed by the KDHE that the person is positive. The 14-day moving average graph shows when the COVID test was performed on each positive case, which is a standard measurement.
- The Douglas County 14-day moving average for PCR test positivity rate as of Monday is **9.1%**. To match the KDHE reporting on positivity rate, this rate is calculated based on PCR tests. We update the moving average Monday and Thursday at [ldchealth.org/456/Case-Numbers-Data](#)
