[KU COVID-19 Dashboard Data](#)

Current LMH Health Inpatients Positive for COVID-19: **4**

More Information at [LDCHealth.org](#) and [douglascountyks.org/coronavirus](#)

- Watch [this video](#) about the data in this report. The new cases that we report each weekday appear as we know about them — when the COVID test result is completed and we are informed by the KDHE that the person is positive. The 14-day moving average graph shows when the COVID test was performed on each positive case, which is a standard measurement. The data are graphed at the earliest dates when a person was tested for COVID-19 and it came back positive.
- We also have a large number of cases become inactive within the past week. Given the increase in the number of cases identified a few weeks ago, we expected a large number of cases to start to become inactive around this time.
