As the number of cases have increased in recent weeks in the state and communities around us, we saw the potential for our numbers to go up. In recent days, we have seen this realization along with a higher level of COVID-19 positive hospitalizations. All of these trends are a reminder for people to redouble their efforts about mask wearing, spreading out and keeping your circle of contacts small. Our disease investigators also have noticed a concerning trend of individuals not staying home while awaiting a COVID-19 test result. If your result is positive, you don't want to risk exposing others, and staying home will help control the spread of the virus in our community.

“Honor those around you by taking care of yourself,” said Dr. Christopher Penn, infectious disease specialist at LMH Health.
